

Which meetup did you attend?

I attended the meet up about Entrepreneurship for Tech Employees so I have the knowledge to start my own company in the future.

What did you learn?

I learned less about actual Tech but learned more about the business application aspect of starting your own company. The other thing was the meet up seemed more like a sales pitch to hire this person for a coach and mentor.

Did you meet anyone new?

I didn't meet anyone new because it wasn't an actual meet-up, it was more like a webinar where it's a video you watch and take notes.
