

Instructions: Follow the steps below to set up your GitHub account profile. After watching the video, *Source Control with Git Overview*, you should have already set up a GitHub account for this program. If you have not setup your GitHub account, review the above video in Week 1's curriculum and set your account up before proceeding with this assignment.

GitHub should not be thought of as a resume or networking tool as much as it should be a place to showcase your work and code. To that end, having a GitHub profile that is personalized shows potential employers or clients that you care about your work.

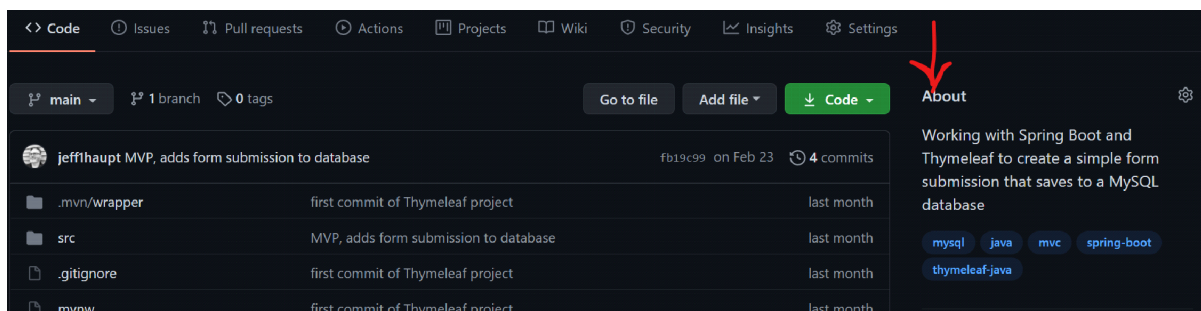

Now that you are set up with GitHub, let's get your profile page ready to go!

First, upload a high-quality headshot to your profile page.

Next, update your profile to discuss what you do and what you are learning. You must think about this one, because GitHub doesn't give you too many characters to accomplish this task.

Follow at least three (3) of your classmates, teachers, or any repository of interest to you.

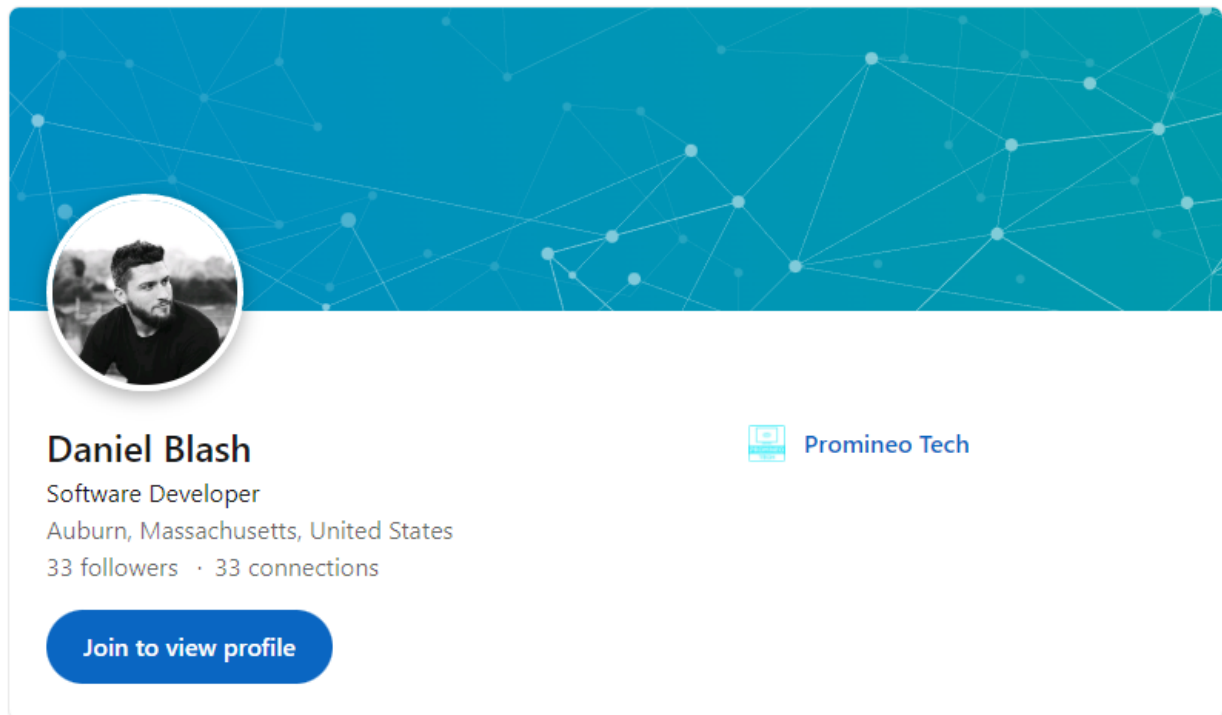

Go to one of your repositories and update the **About** section to discuss what the purpose of the assignment is and tag the languages used like below:

Finally, add a link to your GitHub profile on your LinkedIn page.

NOTE: If you are choosing not to update a LinkedIn page because of your specific employment situation, that is acceptable. If this is the case, please put a note below the *Attach Screenshots of Your Finished LinkedIn Profile here* section below.

About

After around 10 years in the automotive industry, between technician, customer service and management. I made the jump to software development.

<https://github.com/DanBlash>

Attach a Screenshot of Your updated GitHub Account here

The screenshot shows a GitHub profile for 'Dan Blash' (username: DanBlash). The profile includes a circular profile picture of a man with a beard, a bio stating 'Beginning my journey into Software Development and Cyber Security', and an 'Edit profile' button. The navigation bar at the top shows 'Overview' as the active tab, with 'Repositories' (2), 'Projects', 'Packages', and 'Stars' also visible. The 'Popular repositories' section lists two public repositories: 'PromineoTech' (PDF and Txt Files for Promineo Tech) and 'BE-Promineo-Tech' (Java Projects for Promineo Cohort, Java). The '14 contributions in the last year' section displays a calendar grid with green squares indicating contributions. The 'Contribution activity' section shows a timeline for March 2023, highlighting 'Created 7 commits in 2 repositories' (5 commits in DanBlash/PromineoTech and 2 commits in DanBlash/BE-Promineo-Tech) and 'Created their first repository' on Mar 8. The background of the page features a dark, abstract image of a satellite dish.
